JANUARY 1966

FEB 11 1966
January 11, 1966

CURRENT SERIAL RECORDS

SUMMARY

Early January fluid milk prices were generally unchanged to slightly higher than December prices, the Crop Reporting Board reports. Dealers' fluid-use prices increased in 15 markets (one in about every 10 reporting); no substantial declines were reported. Home delivery price changes were as follows: quarts - up in 12 markets, down in 6; half-gallons -- higher in 11 markets, lower in 5. Out-of-store price changes were: half-gallons advanced in 14 markets but declined in 4; gallons were higher in 7 but lower in 2.

Prices of milk used for fluid purposes averaged \$5.57 per hundredweight in early January. This is 1 cent more than December 1965 and 10 cents above January 1965. The price this month is 6 cents higher than the January 1960-64 average. Averages for January were higher than December in 6 regions, about the same in 2, and lower in 1. Compared with January 1965, the average price this month is higher in 8 of the 9 regions. The largest increases by regions were 28 cents per hundredweight in the West North Central and 22 cents in New England. Smaller increases in regional averages from a year earlier were: 13 cents per hundredweight in the Mountain States, 11 cents in the East North Central, 10 cents in the Middle Atlantic, and 7 cents in the East South Central. Increases of 3 cents per hundredweight in the averages were reported for the South Atlantic and West South Central Regions. The average was unchanged in the Pacific Coast area.

The average price per single quart for the most common grade of home delivered milk in 25 major cities was 28.5 cents in early January -- unchanged from December, 0.5 cent above January last year and 1.7 cents greater than the 1960-64 average for the month. Half-gallons sold out of stores in these markets in early January averaged 47.2 cents. This is 0.1 cent more than December, the same as January 1965 and 1.0 cents higher than average.

November average daily sales of whole milk (preliminary) in 9 State and 69 Federal marketing areas were 1 percent below October but 3 percent above a year earlier. October whole milk sales in these markets were 1 percent more than September but were 1 percent less than October 1964. Skim milk sales during October in 77 areas advanced 1 percent from the previous month and 5 percent from a year earlier. Milk and cream mixture sales in 75 marketing areas increased 1 percent from September but were 6 percent below October 1964. Fluid cream sales in 76 areas were 1 percent above September but 3 percent below October the year before. October sales of all fluid products in 76 marketing areas advanced 1 percent from September but was 1 percent under a year earlier. November's total producer receipts in 8 State and 73 Federal order areas decreased 2 percent from November 1964 but average receipts per producer increased 5 percent.

Several minor changes are made in the report beginning this month. Table 1 has been rearranged showing store prices to the left of home delivery prices. Wholesale prices for store quarts have been deleted. This provides additional space for reporting quantity discounts for home delivered milk. Also, in Table 6, pages 18-20, price quotations for additional products have been added for 40 markets. These additional products are breed milk, chocolate whole milk, low-fat milk (2%), skim milk, chocolate drink and buttermilk.

Prices for fluid-use milk in New England in early January averaged \$6.39 per hundredweight. This is unchanged from December but 22 cents higher than January last year. Class I prices in Federal Order markets of New England were the same as December. Most home and store prices were unchanged. However, half-gallons and gallons out of stores in Lowell-Lawrence, Mass. show upward and downward adjustments. Store half-gallons in Rhode Island markets were up 1 cent.

Middle Atlantic Region milk used for fluid purposes averaged \$6.10 per hundredweight in early January -- 3 cents less than December but 10 cents more than January a year ago. The Class I price in Atlantic City and Camden, N. J. was unchanged from December. The only price change reported in Atlantic City was a 1-cent increase in home delivered half-gallons. The only Camden changes were decreases of 1 cent for some home delivered quarts and as much as 5 cents for half-gallons in some stores.

In the East North Central States, fluid use prices in early January averaged \$4.73 per hundredweight. This is 3 cents over December and 11 cents more than in January 1965. The Toledo, Ohio Class I price advanced 21 cents per hundredweight from December. Half-gallons at some stores were up a cent and in some outlets; gallons were up 10 cents. In Youngstown-Warren, Ohio, the Class I price was 15 cents per hundredweight higher. Half-gallons at homes and stores were unchanged but other prices were slightly higher. The Class I price in Evansville, Ind. was virtually unchanged but home and store prices in this market advanced as much as 2½ cents per quart. The Indianapolis, Ind. Class I price was up 6 cents per hundredweight. Home delivery prices declined 1½ to 2 cents per quart; store prices remained at December levels. Springfield, Ill. home and store prices show various upward and downward adjustments. Fluid-use prices in this market are not reported. The only reported price change in Kalamazoo, Mich. was a 3-cent drop in half-gallons out of some stores. In Marquette, Mich. the Class I price advanced 11 cents per hundredweight. Home and store prices were up about a cent per quart. The Green Bay, Wis. Class I price increased 11 cents per hundredweight but other prices were at December levels.

Fluid-use prices in West North Central areas averaged \$4.70 per hundredweight in early January -- 10 cents higher than December and 28 cents above January last year. The Class I price in Minneapolis and St. Paul, Minn. was up 20 cents per hundredweight from December. Home and store prices were unchanged to 1 cent per quart higher. The only important price change reported for Burlington, Iowa was a 2-cent decline in store half-gallon prices. In the Greater Kansas City marketing area, the Class I price was 11 cents per hundredweight higher. Kansas City home and store prices were at December 1965 levels but Topeka store prices showed mixed changes. St. Louis home delivered half-gallons advanced 2

cents but other prices in this market were unchanged. The Lincoln and Omaha, Nebr. Class I price was 31 cents per hundredweight higher. Home and store prices in these markets were generally up a cent per quart. The Scottsbluff, Nebr. Class I price was 14 cents per hundredweight above December. Home and store prices in this market have not been reported.

South Atlantic Region Class I prices averaged \$6.03 per hundredweight in early January -- up 5 cents from a month earlier and 3 cents more than in January a year ago. At Norfolk-Portsmouth, Va. home delivered milk was priced higher -- $\frac{1}{2}$ cent per quart and 2 cents per half-gallon. In some stores in this market, prices for half-gallons were 1 cent under a month earlier. In Charleston, W. Va., some home delivered half-gallons were 2 cents below a month earlier for the only noteworthy market change. In the Wheeling, W. Va. market, the dealers' buying price for fluid-use milk was 12 cents per hundredweight higher than in early December. Home and store prices held unchanged. At Tampa, Fla. the Class I price rose 36 cents per hundredweight above December while the half-gallon price increased 5 cents in some stores.

Early January prices for milk used for fluid purposes in the East South Central Region averaged \$5.63 per hundredweight -- 1 cent more than December and 7 cents above January last year. At Louisville, Ky., the only reported change was an increase of 2 cents per home delivered half-gallon.

Fluid-use milk prices in the West South Central Region in early January averaged \$5.80 per hundredweight -- 5 cents more than December and 3 cents above January a year ago. Fort Smith, Ark. store half-gallon prices rose 6 to 11 cents above early December as price war conditions eased somewhat. Other prices held firm in this market. At Little Rock, prices were up as follows: home delivery -- quarts up 1 cent, half-gallons 1 cent; out-of-store -- half-gallons up 3 cents, gallons up 6 cents. Oklahoma City, Okla. home delivered half-gallons were priced 2 cents lower than in early December by some firms. At Dallas, Tex., prices of home and store quarts and half-gallons rose 1 to 2 cents and store gallons gained 2 to 4 cents.

Dealers' buying prices in the Mountain States averaged \$5.57 per hundredweight in early December -- 8 cents above a month earlier and 13 cents over January 1965. At Idaho Falls, dealers' buying prices rose 40 cents per hundredweight above December but home and store prices on fluid milk held unchanged. Many other reporting markets indicated small increases in dealers' buying prices. There were no reported changes for the entire region in either home delivery or out-of-store milk prices to consumers.

Pacific Coast prices for fluid-use milk averaged \$5.34 per hundredweight in early January, unchanged from both a month and a year earlier. The Class I price advanced 10 cents per hundredweight in Spokane, Wash. Home and store price increases were as much as $1\frac{1}{2}$ cents per quart as price-war conditions reported last month relaxed. In Sacramento, Calif. half-gallons and gallons out of stores decreased $\frac{1}{2}$ cent per quart for the only reported price change.

Prices of milk sold in plastic containers average higher than in paper and glass

The milk prices shown in this report by container size are for the most common type of container. Although often reported, prices of milk sold in less common containers are usually not published. With the advent of the molded or

Dec. price same as Jan. y. Federal Order Minimum price. w. Paper 2¢ higher. A. Plastic containers. B. South Carolina average Class I price for the State: October \$5.93 for 3.5% handler differential 7.0, November \$5.89. C. Lowell-Lawrence store gal. Dec. 91-93¢, store half-gal. 50-54¢.

(Continued from page 3)

blown plastic container, there has been speculation regarding the differences in milk prices by type of container. From comments received from handlers in 24 markets, average prices for milk sold in plastic, paper and glass containers were compared for early December. As sales in plastic containers become more common, the differences shown here may well become considerably narrower.

The sale of milk in plastic containers was most often reported in gallon containers sold out of stores. For 24 markets with comparable prices for plastic and paper containers, the average out-of-store price for milk sold in gallon plastic containers was 93.4 cents in early December. This is 1.7 cents higher than the average of 91.7 cents for store milk sold in paper gallons. For 18 markets having comparable glass, paper and plastic quotations, the average store price for milk in plastic was 91.6 cents. This is 1.4 cents higher than the 90.2 cent average for milk sold in paper in these 18 markets. Prices for milk sold in gallon glass containers in these 18 markets averaged 85.9 cents or 4.3 cents below paper and 5.7 cents under plastic. However, these prices for milk in glass do not include allowances for bottle deposits.

Continued on page 28

25 cities average....	26.8	28.0	28.5	28.5	46.2	46.3	47.1	47.2

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.
b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

*Revised.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS
UNDER STATE AND FEDERAL REGULATION, OCTOBER-NOVEMBER 1965

Whole milk sales in November increase 3 percent from a year earlier

Sales of whole milk (preliminary) during November in 78 marketing areas (9 State and 69 Federal) averaged 96.6 million pounds per day. This is 1 percent less than in October but 3 percent more than a year earlier. November included 4 Sundays in 1965 compared with 5 Sundays in 1964. Total sales during January through November 1965 were 1.1 percent above the corresponding period of 1964.

October whole milk sales down 1 percent

Whole milk sales in these 78 areas during October, on an average daily basis, advanced 1 percent from September but were 1 percent below October 1964. October 1965 had 5 Sundays whereas October 1964 had only 4. Home delivery and store sales are very light on Sundays, reducing daily average sales for the month. The average milkfat test of October sales was 3.54 percent, compared with 3.53 percent in September 1965 and 3.55 percent in October 1964.

Sales of skim milk up 5 percent from October 1964

Skim milk sales on an average daily basis during October in 77 marketing areas increased 1 percent from September and were 5 percent higher than in October the year before. January through October total sales in these markets were 7 percent larger than those of the comparable 1964 period. The average test of sales of skim milk items in these markets was 1.38 percent, the same as September but slightly above October 1964.

Milk and cream mixture sales 6 percent below a year earlier

Average daily sales of milk and cream mixtures in 75 marketing areas during October were up 1 percent from the previous month but 6 percent below October 1964. Combined January through October sales in these markets were 2 percent smaller than the comparable period of 1964.

October fluid cream sales off 3 percent from the previous year

Average daily sales of fluid cream in 76 marketing areas during October were 2 percent more than September but 3 percent less than October 1964. Total sales of cream for the first 10 months of 1965 were 1 percent below the corresponding period of 1964.

Total fluid product sales 1 percent under October a year ago

During October, average daily sales of all fluid products in 76 marketing areas advanced 1 percent from September but decreased 1 percent from October 1964. Combined sales of all fluid products in the first 10 months of 1965 were 1 percent more than in this period of 1964. The average milkfat test of October sales, at 3.55 percent, was the same as September and compared with 3.58 percent in October 1964.

Continued on page 28

OFFICIAL BUSINESS

(Continued from page 21)

Receipts from producers in November down 2 percent from November 1964

November average daily receipts of milk from producers in 8 State and 73 Federal order marketing areas decreased 2 percent from a year earlier. Average daily receipts per individual producer, at 908 pounds, increased 5 percent from November the previous year.

December milk production drops 4 percent below a year earlier

Milk production in the United States during December is estimated at 9.6 billion pounds, 4 percent less than in December 1964 when output was at a record high for the month. Average daily milk production advanced about 2 percent from November to December, compared with a seasonal rise of 3 percent a year earlier. Relative to population, milk production amounted to 1.58 pounds per person daily, 5 percent below December a year ago.

(Continued from page 3)

Of the 24 markets for which milk in plastic and paper prices were compared, 15 showed higher prices where plastic packages were used. Seven markets reported differences of more than a cent per quart but in 8 markets the difference was less than a cent per quart. In 6 markets, milk in plastic and paper was at the same price, but in 3 markets milk in plastic containers was lower than in paper.

Comparing prices of milk in paper and glass containers by individual markets, 12 of 18 markets reported higher prices for milk in paper. Six of these showed differences of more than a cent per quart. In 5 markets, milk in paper and glass were at the same price but in 2 markets, milk in paper cartons were lower than in glass jugs.

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Fort Wayne, Northwestern and Indianapolis; Illinois-Chicago, ^aRock River Valley and Suburban St. Louis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison, Milwaukee and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks, St. Joseph and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley, Southwest and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling, Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Colorado Springs-Pueblo, Eastern and Western; and Washington-Inland Empire and Puget Sound.

a. Sales for Rock River Valley are not included in the group totals shown in tables 7, 8, 9, 10 and 11.

FLUID MILK AND CREAM REPORT

APR 12 1966

1.9
M 34 M
p. 2
FEBRUARY 1966

CURRENT SERIAL RECORDS

February 17, 1966

SUMMARY

Dealers' buying prices and home and store prices in early February were unchanged to slightly higher, the Crop Reporting Board reports. Dealers' prices of milk for fluid use advanced in 3 markets but declined in 1. Milk delivered to homes in quarts was up in 13 markets but down in 6; for half-gallons, prices were higher in 12 markets, lower in 5. Out of stores, prices for half-gallons advanced in 13 markets, declined in 8; for gallons, 10 markets were higher, 4 lower.

Early February prices of milk for fluid use averaged \$5.60 per hundredweight--3 cents higher than January and 17 cents above February 1965. Compared with the 1960-64 average for February, the average this month was 13 cents higher. Averages were above January in 4 of the 9 regions, and about the same in 5 regions. The February average was higher than a year earlier in all of the 9 regions. These increases ranged from 1 cent per hundredweight on the Pacific Coast to 33 cents in the West North Central Region. Sizable regional increases were 24 cents per hundredweight in the East North Central, 22 cents in New England, 18 cents in the Middle Atlantic, and 17 cents in the Mountain States. Other smaller increases in regional averages were: 11 cents per hundredweight in both the East South Central and West South Central and 7 cents in the South Atlantic.

The average single quart home delivered price for the most common grade of whole milk in 25 major cities in early February was 28.6 cents. This is 1-tenth of a cent more than January, 5-tenths of a cent over February last year, and 1.8 cents above the 1960-64 average for the month. Half-gallons out of stores averaged 47.4 cents for these same cities in early February. This is 2-tenths of a cent higher than January, and 1.2 cents over February 1965. It is 1.1 cents more than the 1960-64 February average.

Average daily sales of whole milk (preliminary) in 9 State and 69 Federal marketing areas in December were 2 percent less than in November but 1 percent above December 1964. November whole milk sales in 78 areas were unchanged from October but 4 percent above a year earlier. Skim milk sales in 77 marketing areas rose 1 percent from October to November and were 12 percent above November the previous year. November sales of milk and cream mixtures (half-and-half) in 75 marketing areas were 3 percent above October and 1 percent over November 1964. Average daily sales of fluid cream in 76 marketing areas in November advanced 21 percent from October and were 2 percent greater than a year earlier. Sales of all fluid items (average daily) in 76 marketing areas during November were 1 percent above a month earlier and 6 percent more than a year earlier. Producer receipts during December in 8 State and 72 Federal order marketing areas decreased 2 percent from December 1964. Receipts per producer for December at 938 pounds daily, increased 4 percent from a year earlier.

PRICES IN FLUID MILK MARKETS, FEBRUARY 1966

Dealers' buying prices for fluid-use milk in New England in early February averaged \$6.39 per hundredweight -- the same as last month but 22 cents higher than February a year ago. Class I and home delivery prices in Southern New Hampshire markets were at January levels but store prices were $\frac{1}{2}$ cent to a cent lower. Bellows Falls and Burlington, Vt. prices were up 1 cent per quart in all containers except store half-gallons in Burlington, which were unchanged. Fluid-use prices in these markets are not currently determined.

In the Middle Atlantic Region, early February Class I prices averaged \$6.09 per hundredweight. This is 1 cent under January but 18 cents over February 1965. Small adjustments were reported in the Nassau, and Suffolk, and Westchester County areas of New York. Increases of up to 2 cents per quart in home delivered prices were reported for Camden, N. J. with store prices and Class I unchanged. In Philadelphia, the Class I price was unchanged from January but most home and store prices were 1 cent per quart higher.

Milk used for fluid purposes in the East North Central States in early February averaged \$4.83 per hundredweight -- 9 cents more than January and 24 cents greater than February a year ago. The Class I price in Northeastern Ohio was unchanged from January. Akron and Canton home and store prices generally advanced about a half-cent per quart. Home delivery prices in Cleveland were unchanged but store prices were about $\frac{1}{2}$ cent per quart above January. In Youngstown, home delivery prices were up from $\frac{1}{2}$ cent to 1 cent per quart but store prices were unchanged. The Class I price in Columbus, Ohio was 10 cents per hundredweight higher, home delivery prices were unchanged but store prices were up a cent per unit. Alton, Ill., recovering from price war conditions, saw store half-gallons up as much as 13 cents for the principal change in the market. In Chicago, the Class I price was 30 cents per hundredweight higher and home and store prices were 1 cent per quart above January. Class I prices in Grand Rapids and Kalamazoo were at January levels. Grand Rapids, Mich. home and store prices were about a cent per quart lower; other prices in this market were the same as January. Kalamazoo, Mich. home delivered quarts dropped a cent for the only change there. Store half-gallons at some outlets were a cent per quart higher in Marquette, Mich. for the only important price change in that market.

West North Central prices of milk for fluid milk use in early February averaged \$4.71 per hundredweight. This is 1 cent more than January and 33 cents more than a year earlier. Minneapolis prices made some downward adjustment for home delivery but other prices were unchanged. St. Paul, home delivered prices were as much as a cent per quart higher but store prices were $1\frac{1}{2}$ cents lower. The Class I price in these markets was unchanged from January. The Class I price in Ft. Dodge, Iowa was unchanged but home and store prices were generally up a cent. Prices advanced in Sioux City, Iowa by 13 cents per hundredweight for Class I milk and 1 cent per quart on routes and out of stores. Scottsbluff, Nebr. gallons out of stores were as much as 4 cents higher for the only important price change. The Class I price in Wichita, Kans. was unchanged but other prices were generally a cent higher.

In markets of the South Atlantic Region, Class I prices in early February averaged \$6.05 per hundredweight -- up 2 cents from January and 7 cents from February 1965. The only reported change in consumer prices in the region was a 6 to 8-cent increase in store gallons in Columbia, S. C.

Dealers' buying prices for fluid-use milk in the East South Central States averaged \$5.63 per hundredweight in early February. This is the same as January but is 11 cents over February a year ago. In Lexington, Ky., some dealers were charging 2 cents less for half-gallons delivered to homes but store half-gallons were 2 cents higher. In Louisville, Ky., some store outlets were selling both half-gallons and gallons for a cent per container less than January for the only price changes in the market. Nashville, Tenn. reported Class I and home delivery prices unchanged but store prices up to a half cent per quart higher.

West South Central fluid-use milk prices in early February averaged \$5.84 per hundredweight -- 4 cents more than January and 11 cents over February a year ago. In Little Rock, Ark., the only important price change was an 18-cent increase in gallons out of stores. Tulsa, Okla. reported a price decline of 3 cents for store gallons for the only important price difference. In Abilene, Tex., home delivered half-gallons were 2 cents lower, and store half-gallons were 2 cents less in some outlets for the only reported changes. Home delivered prices in Amarillo, Tex. were $\frac{1}{2}$ to 1 cent below January for the only reported price changes. A price war was reported in Corpus Christi, Tex. as half-gallons out of stores dropped 13 to 29 cents, with other units making similar decreases. The Class I price in Houston, Tex. advanced 23 cents per hundredweight; home and store prices were unchanged. Price war conditions were reported in Lubbock, Tex., with heaviest competition on half-gallon and gallon container sizes. Home delivered quarts in San Antonio decreased 2 cents with other prices at January levels.

Milk for fluid purposes in the Mountain States, averaging \$5.57 per hundredweight in early February, was unchanged from January, but 17 cents higher than February, 1965. Some store half-gallons in Denver were selling 1 cent per quart above January while some store gallons were 1 cent per quart below January; other prices in this market were unchanged.

Pacific area Class I prices in early February averaged \$5.34 per hundredweight. This is the same as January and 1 cent above a year earlier. The Class I price in Bremerton, Wash. dropped 30 cents per hundredweight. Home and store prices in this market remained at January levels. Home and store prices in Spokane, Wash. were about a cent higher. The Class I price advanced 6 cents per hundredweight in this market. Quart and half-gallon prices in Los Angeles advanced $\frac{1}{2}$ cent per container at both homes and stores; store gallons were up a cent. The Class I price in this market was unchanged.

(Continued from page 21)

Total fluid sales in November 6 percent above a year earlier

Sales of all fluid items in 76 marketing areas during November were 1 percent above October and 6 percent more than a year earlier. Combined January-November sales of all fluid products were 2 percent more than in the same 1964 period. The average milkfat test of November sales, at 3.61 percent, compares with 3.55 percent in October and 3.64 percent in November 1964.

Receipts from producers in December down 2 percent

December average daily receipts of milk from producers in 8 State and 72 Federal order marketing areas decreased 2 percent from a year earlier. Average daily receipts per producer, at 938 pounds, increased 4 percent from a year earlier.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

*Revised.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS
UNDER STATE AND FEDERAL REGULATION, NOVEMBER-DECEMBER, 1965

Whole milk sales in December 1 percent above a year earlier

Sales of whole milk (preliminary) during December in 78 marketing areas (9 State and 69 Federal) averaged 94.0 million pounds per day -- 2 percent less than in November but 1 percent more than the 92.9 million pounds of December a year ago. Total 1965 whole milk sales were 1 percent above those of 1964.

November whole milk sales up 4 percent

Whole milk sales in 9 State and 69 Federal order areas during November, on an average daily basis, were unchanged from October but 4 percent above November 1964. November 1965 had only 4 Sundays whereas October 1965 and November 1964 each had 5. Home delivery and store sales are very light on Sundays, reducing daily average sales for the month. The average milkfat test of November sales, at 3.54 percent, was unchanged from October and compares with 3.55 percent in November the year before.

Skim milk sales 12 percent above November a year ago

November average daily sales of skim milk items in 77 markets rose 1 percent from October and were 12 percent above a year earlier. The average milkfat test of skim product sales, at 1.38 percent, was unchanged from October and compares with 1.32 percent for November 1964.

Milk and cream mixture sales up 1 percent; November fluid cream sales up 2 percent

November sales of milk and cream mixtures (half-and-half) in 75 marketing areas were 3 percent above October and 1 percent over November a year ago. Average daily sales of fluid cream in 76 marketing areas during November advanced 21 percent from October and were 2 percent above November 1964. For the January-November period, 1965 sales were 1 percent under 1964.

(Continued on page 13)

ANNUAL SUMMARY: PRICES AND RECEIPTS, 1965

(Pages 28-31)

Dealers' buying prices average 4 cents higher

Prices of milk used for fluid purposes in 1965 averaged \$5.39 per hundredweight, 4 cents more than in 1964. Averages were higher than a year earlier in 9 of the 12 months, lower only in two -- January and March. In January and February, averages were little changed from the same month a year earlier. The average in March was 5 cents per hundredweight lower, but in April it was the same as a year earlier. The average was higher all other months of the year. The largest gain was 7 cents in September. In 7 of the 9 regions, buying prices averaged higher than in 1964 -- from 1 cent per hundredweight in the Middle Atlantic to 6 cents higher in each the East North Central, West North Central, and East South Central. Other regional increases were: Mountain, 4 cents; South Atlantic, 3 cents; and Pacific, 2 cents. Average decreases from the previous year were 7 cents per hundredweight in New England and 1 cent in the West South Central States.

1/ Prices are the latest reported during the first 10 days of each month. Grades may differ by markets.

2/ New York Metropolitan-New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

3/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every-other-day delivery, the charge represents a two-quart purchase.

*Revised.

F-Federal Order unless otherwise noted; S-From State sources; FS-From Federal and State sources.
1/. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See page 32 for area combinations. 2/. Federal totals less State data on receipts from New Jersey or Mississippi producers where applicable. 3/. Plant receipts of Grade A milk from producers in the State.

Compiled from reports of Market Administrators and State milk control agencies.

OFFICIAL BUSINESS

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Fort Wayne, Northwestern and Indianapolis; Illinois-Chicago, ^aRock River Valley and Suburban St. Louis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison, Milwaukee and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks, St. Joseph and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley, Southwest and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western (receipts only); and Washington-Inland Empire and Puget Sound.

a. Sales for Rock River Valley are not included in the group totals shown in Tables 7, 8, 9, 10 and 11.

(Continued from page 21)

Home delivery quart prices average higher; store half-gallons steady

Prices for single quart home delivered whole milk of the most common grade in 25 major cities averaged 28.1 cents during 1965. This was a half-cent higher than 1964. Averages were up in 20 of the 25 markets, the same in 3 markets, but lower in 2. For milk in half-gallons sold out of stores, the average was 46.2 cents -- the same as the year before. Average prices for milk in half-gallon containers during 1965 were higher in 13 of the 25 markets, about the same in 5 markets, but lower in 7.

Receipts slightly higher than previous year

Receipts of milk from producers during 1965 in 80 areas (8 State and 72 Federal orders) averaged 157 million pounds per day, fractionally more than in 1964. The number of producers in these markets averaged 166 thousand, 6 percent fewer than a year earlier. Receipts per producer, at 950 pounds per day, were up 6 percent.

FLUID MILK AND CREAM REPORT

MARCH 1966

APR 14 1966

March 17, 1966
CURRENT SERIAL RECORDS

SUMMARY

Prices paid by dealers for milk used for fluid purposes and paid by consumers for home delivery and in stores in early March were generally higher, the Crop Reporting Board reports. Dealers' prices for fluid-use milk in 28 markets, one in every 6, were above February levels. Home-delivered quarts were up in 25 markets but down in 3; half-gallon prices were above February levels in 23 but below in 3. Higher out-of-store prices were reported for half-gallons in 27 markets, and for gallons in 17 markets. Store prices were lower in 6 markets for half-gallons and in 4 for gallons.

Dealers' fluid-use paying prices in about 165 markets in the United States averaged \$5.60 per hundredweight in early March. This is unchanged from February, but 30 cents more than March last year and 20 cents above the March 1960-64 average. Compared with February, March prices averaged higher in 5 regions, unchanged in 3, and lower in 1. By regions, increases ranged from 3 cents per hundredweight in the East North Central to 10 cents in the Mountain States. Averages were above March 1965 in 8 of the 9 regions, the gains ranging from 15 cents per hundredweight in the South Atlantic to 50 cents both in the West North Central and West South Central. Other regional increases were: East North Central, 48 cents; New England, 44 cents; Mountain, 37 cents; East South Central, 25 cents; and Middle Atlantic, 19 cents. In the Pacific Region, the average of dealers' buying prices was unchanged from March a year ago.

Single quart prices for the most common grade of whole milk delivered to homes in early March averaged 28.9 cents per quart. This is 0.2 cent above February, 0.9 cent over March last year and 2.1 cents above the 1960-64 average for the month. Out-of-store prices for half-gallons in early March in these markets averaged 47.8 cents -- 0.3 cent above February, 1.5 cents more than March last year and 1.7 cents above average.

Sales of whole milk (preliminary) in 78 marketing areas (9 State and 69 Federal) during January were 2 percent less than December but 1 percent more than a year earlier. Daily sales of whole milk items during December averaged 2 percent below November but 1 percent above December 1964. In 77 areas, skim milk sales were 1 percent below November but 10 percent above December a year ago. Milk and cream mixture sales in 75 areas during December averaged 3 percent more than November, but 1 percent less than December 1964. Sales of other cream items in 76 areas advanced 17 percent from November and were 2 percent above a year earlier. Average daily sales of all fluid items in 76 marketing areas during December were 1 percent below November but were 2 percent above December 1964. Receipts from producers in 8 State and 72 Federal marketing areas for January were 4 percent less than a year earlier. Per producer, receipts were up 3 percent from January last year.

PRICES IN FLUID MILK MARKETS, MARCH 1966

New England milk for fluid use prices in early March averaged \$6.39 per hundredweight. This is unchanged from February but 44 cents higher than a year earlier. The only reported price change from February for the region was an increase of 2 cents for half-gallons out of stores in Bellows Falls, Vt.

Class I milk prices in the Middle Atlantic Region in early March averaged \$6.00 per hundredweight -- 9 cents less than February but 19 cents above March a year ago. Class I prices in the New York-New Jersey Federal order area declined 12 cents per hundredweight. Home and store prices in Northern New Jersey were about 1 cent per quart lower for the major items. Elsewhere in the area, adjustments occurred but most were minor. For Camden, N. J. some home delivered prices were about 1 cent per quart lower. There were minor adjustments in other prices but Class I prices were unchanged. In Harrisburg, Pa., prices were lower by 40 cents per hundredweight for Class I milk and 1 cent per quart for all container sizes.

Milk for fluid use prices in markets of the East North Central Region averaged \$4.88 per hundredweight in early March -- 3 cents above February and 48 cents more than March 1965. Class I prices in the Ohio markets reporting were close to February levels. At Akron, some home and store outlets reported no change in prices but others showed changes of as much as a cent per quart. Minor changes were reported for Columbus. In Dayton, store half-gallons were unchanged; store gallons and home delivered quarts and half-gallons were up a cent per quart. Most Toledo consumer prices were up. Class I prices in Evansville, Fort Wayne and Gary, Ind. were from 11 to 17 cents per hundredweight higher. Store and home prices in these markets were generally unchanged. In Indianapolis, Ind. Class I prices rose 22 cents per hundredweight. Store and home prices advanced from 1 to 2 cents per quart. South Bend, Ind. Class I prices were up 17 cents per hundredweight. Store-purchased and home-delivered milk was priced 1 to 2 cents per quart above February in most instances. Class I prices in Rockford, Ill. rose 18 cents per hundredweight. Store half-gallons and home delivered half-gallons were 2 cents higher. Home and store prices in Peoria and Springfield, Ill. made minor adjustments but were generally unchanged. Class I prices in Battle Creek and Grand Rapids, Mich. were the same as February. Store prices advanced somewhat in Battle Creek for the only reported change. Lower prices, particularly for store sales were reported in Grand Rapids. Beloit, Wis. Class I prices increased 20 cents per hundredweight; store and home sales were 1 cent per quart higher. Eau Claire, Wis. store and home prices were up a cent per quart. Producer prices in this market are not currently determined. Green Bay, Wis. Class I prices were at February levels; at stores and to homes, prices were $\frac{1}{2}$ to 1 cent per quart above last month. In Madison and Milwaukee, Wis., a 30-cent-per-hundredweight increase in Class I prices occurred on February 6. On February 13, most store and home prices advanced a cent per quart.

In West North Central markets, milk used for fluid purposes averaged \$4.75 per hundredweight in early March. This is 4 cents over February and 50 cents more than March a year ago. In the Duluth-Superior, Minn.-Wis. area, Class I prices were 11 cents per hundredweight higher. Other prices in these markets were un-

changed. Class I prices in Bemidji, Minn. were up 10 cents per hundredweight, with store and home prices up about a cent per quart. Class I prices in Minneapolis and St. Paul were 8 cents per hundredweight over February. Adjustments in prices for this market ranged from declines of $\frac{1}{2}$ cent to advances of $1\frac{1}{2}$ cents per quart. A Class I price increase of 25 cents per hundredweight was reported in Burlington, Iowa. Increases of $\frac{1}{2}$ cent to $2\frac{1}{2}$ cents per quart in other prices were reported. In Des Moines, Iowa, Class I prices were at February levels but store and home prices were up $\frac{1}{2}$ cent per quart. Springfield, Mo. reported Class I levels unchanged from February but store and home prices $1\frac{1}{2}$ to $2\frac{1}{2}$ cents per quart higher. Class I prices in Grand Forks, N. D. were unchanged; half-gallons at stores and to homes advanced $\frac{1}{2}$ cent per quart, and home delivered quarts were up a cent. Aberdeen, Rapid City and Sioux Falls, S. D. Class I prices were 11 cents per hundredweight higher than February. At Aberdeen, prices to consumers were up about 1 cent per quart. Store and home prices in Rapid City advanced $\frac{1}{2}$ to 2 cents per quart; Sioux Falls prices were 1 cent per quart over February.

Dealers' buying prices in the South Atlantic States in early March averaged \$6.06 per hundredweight -- unchanged from February but 15 cents over March last year. Store half-gallons in Wilmington, Del. were up 1 cent for the only reported change in this market. Washington, D. C. Class I prices were the same as February; store and home prices advanced a cent per quart. In Charleston and Huntington, W. Va., Class I prices were 15 cents per hundredweight higher. Most other prices in these markets were unchanged but store gallons rose 20 cents. Wheeling, W. Va. Class I prices were up 11 cents per hundredweight; other prices in this market were unchanged. The only reported change in Greenville, S. C. was an increase of 2 cents for half-gallons in some outlets.

East South Central Region prices for milk used for fluid consumption in early March averaged \$5.68 per hundredweight -- 5 cents greater than February and 25 cents more than March 1965. Class I prices in Lexington and Louisville, Ky. were 13 cents per hundredweight higher. Home delivery prices advanced from 1 to 2 cents per quart in Lexington. Other prices in these markets were at February levels.

Prices for fluid-use milk in the West South Central Region averaged \$5.91 per hundredweight in early March -- gains of 7 cents from February and 50 cents from March a year ago. In Fort Smith, Ark., Class I prices increased 11 cents per hundredweight but store half-gallons and gallons were priced 2 to 3 cents lower at some outlets; home delivered milk prices were reported unchanged. At Little Rock, dealers' buying prices were up 10 cents per hundredweight, store half-gallons down 1 cent, store gallons off 8 cents but home delivered half-gallons were up 2 cents. Abilene, Texas dealers paid 10 cents more per hundredweight for fluid-use milk than in February. Home delivered milk was priced at month-earlier-levels, but in stores, half-gallons and gallons were up a cent. In the Corpus Christi and Lubbock, Texas markets Class I prices were also up 10 cents per hundredweight, but consumer prices at stores and homes increased significantly for most size units as previous price war conditions eased.

In the Mountain States, fluid-use prices in early March averaged \$5.67 per hundredweight. This is 10 cents above February and 37 cents more than in March last year. At Colorado Springs, Colo. dealers' buying prices for fluid-use milk were 11 cents above February but no changes were reported in prices to consumers

(Continued from page 21)

Daily sales of all fluid items in these areas for 1965 were 2 percent more than in 1964. The average milkfat test of sales of all fluid products in these areas for December was 3.67 percent. This compares with 3.61 percent in November and 3.69 percent for December 1964.

January receipts from producers drop 4 percent from a year earlier

Average daily receipts from producers during January were 4 percent less than in January 1965. Receipts per producer, at 962 pounds per day, were 3 percent greater than a year earlier.

Milk production during February down 6 percent from February 1965

Production of milk in the United States during February is estimated at 9.3 billion pounds, down 6 percent from February a year ago and the smallest output for the month since 1959. February milk production provided 1.69 pounds per person daily, 7 percent less than in February last year.

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Fort Wayne, Northwestern and Indianapolis; Illinois-Chicago, Rock River Valley (receipts only) and Suburban St. Louis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison, Milwaukee and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks, St. Joseph and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley, Southwest and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.

Table 2.--Dealers' average buying prices for milk for
fluid milk use (f.o.b. city) United States,
by regions, March 1966 a
(Per hundredweight - 3.5% fat; weighted by population of individual markets)

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

*Revised.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS
UNDER STATE AND FEDERAL REGULATION, DECEMBER 1965, AND JANUARY 1966

Both December and January sales of whole milk 1 percent above a year earlier

Sales of whole milk (preliminary) in 78 marketing areas (9 State and 69 Federal) during January averaged 94.1 million pounds per day, 2 percent less than December but 1 percent more than in January 1965. Whole milk sales in these areas during December, on an average daily basis, were 2 percent below November but 1 percent above December 1964. For the entire year, 1965 milk sales (daily basis) averaged 1 percent larger than in 1964.

Skim milk sales in December up 10 percent

Average daily sales of skim milk items in 77 areas during December were 1 percent below November but 10 percent above December 1964. Sales during 1965 when averaged daily, were 8 percent higher than in 1964. The average milkfat test of skim milk sales for December was 1.39 percent, compared with 1.38 percent for November and 1.33 percent for December 1964.

Mixtures' sales slightly lower; other fluid cream sales higher than a year earlier

Sales of milk and cream mixtures (half and half) in 75 areas in December 1965 (daily basis) averaged 3 percent more than November but were 1 percent less than December 1964. Daily sales of these items for 1965 were 2 percent below a year earlier. Other cream item sales for 76 marketing areas advanced 17 percent from November and were 2 percent above December a year ago. Cream sales for the year averaged 1 percent less (daily) than in 1964.

Sales of total fluid items up 2 percent from December 1964

Total fluid item sales, on an average daily basis, in 76 areas during December averaged 1 percent below November but were 2 percent more than a year earlier.

(Continued on page 13)

ANNUAL SALES OF FLUID MILK AND CREAM PRODUCTS, 1964-65
(Individual Products by Areas and Groups of Areas)
(Pages 28-31)

Combined total sales of all whole milk products during 1965 for the State and Federal marketing areas reporting were higher than in 1964; skim milk product sales were substantially higher in nearly all markets. Sales of cream items were generally lower but sales of eggnog and sour cream were above the year before. The whole milk sales reported are for 78 areas; skim milk sales cover 77 areas and sales for most cream items 76 or 77 areas. (All items are shown on an average daily basis.)

Average daily sales of plain whole milk were 1 percent above 1964. Yogurt sales in the areas reporting decreased 15 percent. Sales of flavored whole milk advanced 5 percent. Flavored skim sales (mostly chocolate) in these markets were 3 percent over 1964; sales of plain skim milk were up 6 percent and skim milk with solids added rose 16 percent. Buttermilk sales declined 1 percent for these areas. Milk and cream mixture sales (half and half in most markets) were down 2 percent; eggnog takings were up 5 percent. Light cream sales dropped 7 percent but sour cream sales had a 7-percent increase. However, heavy cream deliveries were 2 percent smaller than in 1964.

F-Federal Order unless otherwise noted; S-From State sources; FS-From Federal and State sources. a. Quantities sold in defined marketing areas (Federal areas adjusted for comparability where necessary); data for 1964 revised, 1965 preliminary. See page 13 for area combinations. b. Delaware Valley less sales in New Jersey as reported by the Office of Milk Industry. c. Sales not shown or included in group totals for markets where individual operations might be disclosed: Cincinnati; Northeastern Ohio, Upstate Michigan, Milwaukee, Northeastern Wisconsin, Duluth-Superior, Des Moines, Sioux City, Eastern South Dakota, Wichita, Central West Texas, Corpus Christi; Lubbock-Plainview, Texas Panhandle, San Antonio, and Inland Empire. d. Plain and flavored whole milk and yogurt combined; also whole lactic and creamed buttermilk for North Carolina. e. Memphis sales in Mississippi excluded. f. Computed from unrounded data. Totals include data for markets which have not been shown to avoid disclosure of individual operations. For comparability, totals include only those areas where data are shown or indicated for both years. g. Flavored milk included with plain whole milk for Inland Empire.

Compiled from reports of Market Administrators and State milk control agencies.

OFFICIAL BUSINESS

(Continued from page 3)

at stores or homes. Other markets reporting 11 cents per hundredweight increases for fluid-use milk but no changes in selling prices to consumers were Denver and Pueblo, Colorado and Phoenix and Tucson, Ariz. Salt Lake City dealers' buying prices for fluid use milk in early March were 12 cents higher than in February. Store half-gallons in this market were up 2 cents and home delivered quarts and half-gallons 1 cent higher per unit.

On the Pacific Coast, fluid-use prices averaged \$5.34 per hundredweight in early March, unchanged both from February this year and March 1965. At Spokane, dealers' buying prices were up 11 cents. Some home delivered single quarts were priced a cent above February -- the only reported change in consumer prices.

FLUID MILK AND CREAM REPORT

MAY 18 1966

Apr. 2
APRIL 1966CURRENT SERIAL RECORDS
April 18, 1966

SUMMARY

In early April, dealers' buying prices for fluid milk showed mixed changes from March; consumer purchasing prices were higher in a number of markets, the Crop Reporting Board reports. Fluid-use prices were above March in 38 reporting markets or 1 in about every 4; lower prices were reported in 25. Home delivery prices were up in 35 markets for quarts and 42 markets for half-gallons. At stores, higher prices were reported in 44 markets for half-gallons and 36 markets for gallons. On the other hand, lower prices prevailed as follows: home delivery, quarts in 9 markets, and gallons in 7; out-of-stores, half-gallons in 9 markets, gallons in 7.

Milk used for fluid purposes in early April in about 165 markets in the United States averaged \$5.60 per hundredweight, about the same as March but 42 cents more than April last year. Compared with the April 1960-64 average, the price was 39 cents per hundredweight higher. April averages for 5 of the 9 regions were higher than March, about the same in 2 regions, and lower in 2. Compared with a year earlier, the April average was higher in all 9 regions. These increases ranged from 1 cent per hundredweight in the Pacific to 70 cents in the West North Central Region. Other upward differences in regional averages were: New England, 66 cents; West South Central, 61 cents; East North Central, 48 cents; Middle Atlantic, 45 cents; Mountain, 44 cents; East South Central, 36 cents; and South Atlantic, 29 cents.

For the most common grade of whole milk sold out of stores in 25 cities, the early April price per half-gallon averaged 48.3 cents. This is one-half cent above March, 2.3 cents over April last year, and 2.9 cents higher than the 1960-64 April average. Prices for milk per single quart delivered to homes averaged 29.0 cents in the same cities -- one-tenth cent over March, 1.1 cents above April a year ago, and 2.4 cents greater than average.

Whole milk sales (preliminary) in 78 marketing areas (9 State and 69 Federal) during February, on a daily basis, averaged 2 percent more than in January this year and February of 1965. January sales were unchanged from December but were 1 percent above January last year. Skim milk sales for January in 77 areas were 1 percent above December and 9 percent more than a year earlier. Sales of milk and cream mixtures in 75 areas were 8 percent under December and 2 percent below January 1965. Other cream item sales in 76 areas dropped 33 percent from December and were 3 percent under January last year. Total fluid sales averaged 2 percent below December but were 2 percent above January last year. February producer receipts in 8 State and 72 Federal markets were 3 percent less than a year earlier. Receipts per producer averaged 993 pounds per day, 4 percent more than in February, 1965.

SPECIAL IN THIS ISSUE

FLUID MILK AND CREAM CONSUMPTION, UNITED STATES, 1950-65.....Page 21

PRICES IN FLUID MILK MARKETS, APRIL 1966

Dealers' buying prices in New England markets in early April averaged \$6.17 per hundredweight. This is down 22 cents from March but is 66 cents more than April 1965. Class I prices in all reporting New England markets declined 22 cents per hundredweight from March. Home and store prices in Maine markets declined one-half cent per quart. New Hampshire prices decreased one-half cent per quart for most items. In Vermont, half-gallon home-delivery prices advanced a cent for the only price change. Lower prices for gallons out of some stores was the only reported Boston price change. Mixed price changes were reported for Lowell-Lawrence and New Bedford, Mass. Home and store prices held at March levels in Springfield and Worcester, Mass., Rhode Island and Connecticut.

Middle Atlantic Class I prices in early April averaged \$5.96 per hundredweight -- 4 cents less than March but 45 cents above April 1965. Class I prices in the New York-New Jersey Federal order area were down 8 cents from March. Binghamton and Schenectady reported advances. Mixed changes were reported for New York Metropolitan markets. Northern New Jersey prices were up a cent per quart. Delaware Valley Class I prices declined 20 cents per hundredweight. Home and store prices in Atlantic City and Trenton, N. J. and Philadelphia were reported unchanged. Camden, N. J. prices showed mixed changes. The Class I price in Harrisburg, Pa. was 40 cents per hundredweight higher; home and store prices advanced a cent per quart. Home delivery prices in Johnstown, Pa. were one-half cent to a cent higher; other prices were at March levels. Pittsburgh prices increased 20 cents per hundredweight for Class I milk and one-half cent per quart to consumers.

In the East North Central States, prices for fluid-use milk in early April averaged \$4.98 per hundredweight. This is 9 cents above March and 48 cents more than April last year. Class I prices in Ohio markets showed minor adjustments from March levels. Home and store prices in Akron, Canton, Cleveland, and Youngstown were generally a cent per quart higher. Cincinnati and Columbus prices were unchanged to as much as 2 cents per quart higher. Half-gallon store prices in Dayton and Toledo were higher but other prices were unchanged. The Class I price in Evansville, Ind. was 14 cents per hundredweight above March. Home and store prices were unchanged to as much as 2 cents per quart higher. Class I prices in Alton and Springfield, Ill. were up 23 cents per hundredweight; Rock Island prices were 17 cents higher, Peoria unchanged. Home delivery prices in most of these markets were at March levels; store prices advanced somewhat. Class I prices in Southern Michigan areas increased 30 cents per hundredweight. Most home delivery prices in these markets were unchanged; store prices advanced a cent to a cent and a half in most instances but were also unchanged in other instances. The Green Bay, Wis. Class I price advanced 11 cents per hundredweight; home and store prices were unchanged.

Fluid-use prices in the West North Central Region averaged \$4.87 per hundredweight -- 12 cents above March and 70 cents more than April last year. In the Duluth-Superior, Minn.-Wis. market, the Class I price advanced 32 cents per hundredweight; home and store prices in this market were at March levels. The Class I price in Bemidji, Minn. was 15 cents per hundredweight higher with most home and store prices unchanged. Minneapolis and St. Paul, Minn. were up 24 cents per hundredweight. Home delivery prices in these markets were unchanged;

store prices advanced as much as $1\frac{1}{2}$ cents per quart. The Class I price in Winona, Minn. increased 15 cents per hundredweight. Home and store prices were about a cent per quart higher. Store prices dropped a cent per quart in Burlington, Iowa for the only important change in the market. The Des Moines, Iowa Class I price was 27 cents per hundredweight higher. Home and store prices were generally unchanged. The Class I price in Ft. Dodge, Iowa was 17 cents per hundredweight higher. The St. Louis price advanced 23 cents and Springfield, Mo., 30 cents. Home and store prices in most instances in these three markets were at March levels. The Class I price in Grand Forks, N. D. was 14 to 16 cents per hundredweight higher; other prices were unchanged. Class I prices in Topeka and Wichita were close to March levels. Home and store prices in Topeka were 1 to 2 cents per quart higher; Wichita prices were unchanged to lower.

In the South Atlantic area, Class I prices in early April averaged \$6.06 per hundredweight. This is the same as March, although 29 cents above April 1965. At Wilmington, Del., the Class I price per hundredweight in early April was 20 cents less than in March. Prices for milk home delivered and sold in stores were reported unchanged from March levels. Baltimore, Md. prices for store and home delivered half-gallons were up 2 cents from March and home delivered quarts cost consumers, 1 cent more. The Class I price per hundredweight at Bristol, Va.-Tenn., was down 11 cents. Home and store prices were up 1 to 3 cents per quart. At Charleston and Huntington, W. Va., Class I prices were 14 cents per hundredweight above March. At Charleston, store half-gallons were 2 to 5 cents lower. Home-delivered prices of quarts and half-gallons at Huntington were 1 cent per unit above March. Wheeling home and store prices were 1 cent per quart higher. In Greenville, S. C., some store half-gallons were up 4 cents from March. In Miami and Tampa, Fla., the Class I price per hundredweight in early April was 14 cents above March; consumer prices were unchanged.

Prices for milk sold for fluid purposes in the East South Central States in early April averaged \$5.72 per hundredweight -- 4 cents more than March this year and 36 cents more than April 1965. At Lexington and Louisville, Ky. the Class I price per hundredweight in early April was up 14 cents from March. Lexington home and store prices were generally up 1 to 2 cents per quart. At Louisville, home and store prices for milk remained at month earlier levels. The Paducah, Ky. Class I price was 6 cents per hundredweight above March; home and store prices were up 1 cent per quart. Except for an 8-cent drop in the Class I price, the only Memphis price change was for store half-gallons, up 2 to 4 cents. In Mississippi markets, Class I prices were 13 cents per hundredweight above March; home and store prices were unchanged.

West South Central market prices for Class I milk in early April averaged \$5.91 per hundredweight. This is unchanged from March but 61 cents above April 1965. The Fort Smith, Ark. Class I price was 8 cents per hundredweight under March. The only change in home and store prices was for store gallons, up 1 to 3 cents from March levels. At Little Rock, the Class I price was also 8 cents below a month earlier; most home and store prices were unchanged. The Lawton, Okla. Class I price was unchanged from March but home and store prices were generally 1 to 2 cents higher per quart equivalent. In the Oklahoma City and Tulsa, Okla. markets, the Class I prices were 13 cents below March; Oklahoma City prices remained at March levels. At Tulsa, home and store prices were generally 1 to 2 cents per quart above March. At Abilene, Amarillo, Austin, Dallas, Houston, and San Antonio, Tex., Class I prices were close to March levels. Home and store prices were unchanged to as much as 2 cents per quart higher.

(Continued from page 3)

Milk sold for fluid purposes in the Mountain States, at \$5.76 per hundredweight in early April, averaged 8 cents more than March and 44 cents above April last year. At Idaho Falls, Idaho, the dealers' buying price was unchanged but some consumer prices were higher. Class I prices were 10 cents per hundredweight above March in the Eastern Colorado and Arizona markets. Home and store prices in these markets were generally 1 to 2 cents per quart higher. Salt Lake City Class I prices were up 11 cents per hundredweight. There were no reported changes in prices of milk to consumers. In Pacific Coast markets, fluid-use prices in early April averaged \$5.35 per hundredweight -- 1 cent above March this year and April 1965. The dealers' buying price in Bremerton, Wash. was 13 cents per hundredweight higher; other prices in this market were unchanged. No other price changes in this region were reported.

Table 2.--Dealers' average buying prices for milk for
fluid milk use (f.o.b. city) United States,
by regions, April 1966 a
(Per hundredweight - 3.5% fat; weighted by population of individual markets)

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.
b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

1/ February same as March.

* Revised.

Feb. 1-15, \$4.61; Feb. 16-28, \$4.78.

Half-and-half sales down 2 percent from January 1965

(Continued from page 21)

Sales of milk and cream mixtures (half-and-half) in 75 marketing areas during January were 8 percent under December and 2 percent lower than January a year ago. The average milkfat test of sales of this product, at 11.8 percent, was the same as both December and January 1965.

January sales of other cream items 3 percent below last year

Sales of cream items other than mixtures in 76 marketing areas for January dropped 33 percent seasonally from December and were 3 percent under January last year. The average milkfat test of the cream items sold in these markets was 22.5 percent, compared with 23.3 percent in December and 22.8 percent in January 1965.

Continued

Total fluid sales up 2 percent

(Continued from page 17)

Sales of all fluid products in the 76 marketing areas during January averaged 2 percent below December but were 2 percent above a year earlier. The average milkfat test of all fluid products sold in these markets for January was 3.54 percent. This compares with 3.67 percent in December and 3.57 percent in January last year.

Continued

Receipts from producers during February down 3 percent from a year earlier (Continued from page 18)

Producer receipts during February (average daily) in 8 State and 72 Federal order markets were 3 percent below a year earlier. Per producer, receipts of 993 pounds per day were 4 percent above February 1965.

March milk output 5 percent below March a year ago

Milk production in the United States during March is estimated at 10.6 billion pounds, 5 percent less than a year earlier and 3 percent below the March 1960-64 average. March output provided 1.75 pounds per person daily, compared with 1.85 pounds in March a year ago.

1/ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced. 2/ Includes estimates for Alaska and Hawaii beginning with 1960. 3/ Preliminary.

CONSUMPTION OF FLUID MILK AND CREAM IN THE UNITED STATES, 1965

Consumption of fluid milk and cream products by the civilian population during 1965 is estimated at 302 pounds of milk equivalent per person, the Crop Reporting Board reports. This is down 3 pounds from 1964, the same year-to-year decline as a year earlier. Consumption by the nonfarm population, at 300 pounds per person in 1965, is 2 pounds below the previous year. On farms, estimated average consumption of 382 pounds per person is down 7 pounds from 1964. All of these consumption estimates are expressed as milk equivalent. This is the quantity of producer milk at average milkfat test which is required to provide the quantity of milkfat used in all fluid products.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS UNDER STATE AND FEDERAL REGULATIONS, JANUARY-FEBRUARY 1966

Sales of whole milk: February, 2 percent, January, 1 percent above a year earlier

Average daily whole milk sales (preliminary) during February in 78 marketing areas (9 State and 69 Federal) amounted to 98.7 million pounds. This is 2 percent more than January and also 2 percent higher than the 96.8 million pounds per day in February 1965. Daily whole milk sales during January in these 78 areas were unchanged from December but were 1 percent above January a year ago. The average milkfat test of whole milk sold in January was 3.54 percent, the same as both December and January 1966.

Sales of skim milk products up 9 percent from January a year ago

Skim milk sales (average daily) for January in 77 marketing areas were 1 percent more than December and 9 percent above January last year. The test of milkfat in these products averaged 1.39 percent, unchanged from December but up from 1.33 percent in January last year.

FLUID MILK AND CREAM REPORT

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

Resume
1.9
m 34m
MAY 1966

JUL 2 1966
May 19, 1966

SUMMARY

CURRENT SERIAL RECORDS

Early May fluid milk prices were steady but showed mixed movement at both dealer and home and store levels, the Crop Reporting Board reports. Dealers' buying prices for milk used for fluid purposes were lower in 24 markets or 1 in about every 14; prices were higher in 3. Store price changes were: half-gallons -- up in 25 markets, down in 3; gallons -- higher in 12, lower in 19 markets. Home delivery prices decreased in 23 markets for quarts and 21 markets for half-gallons. However, prices were reported at higher levels in 11 markets for quarts and 16 markets for half-gallons.

Dealers' buying prices for fluid milk in early May averaged \$5.50 per hundredweight. This is 10 cents below April but 40 cents above May 1965. The May price is 39 cents higher than the 1960-64 May average. Regional averages were the same as April in 4 of the 9 regions. May prices averaged lower than April in 4 regions, but advanced in 1. Compared with a year earlier, average prices were higher in all 9 regions. These increases ranged from 3 cents per hundredweight in the Pacific States to 67 cents in the West North Central. Other large upward changes were: 63 cents per hundredweight in the West South Central States, 47 cents in the East North Central, 44 cents in New England, 43 cents in the Middle Atlantic and 41 cents in the Mountain States. Smaller increases were 32 cents per hundredweight in the East South Central and 29 cents in the South Atlantic.

Store half-gallons of whole milk in early May averaged 48.6 cents per quart for the most common grade in 25 major cities. This is 0.3 cent more than April, 3.1 cents above May 1965, and 3.3 cents greater than average. Prices per single quart delivered to homes in these same markets averaged 29.2 cents in early May. This is 0.2 cent under April, but 1.4 cents over May last year, and 2.7 cents above average.

Average daily whole milk sales (preliminary) during March in 9 State and 69 Federal order areas were fractionally below February but fractionally above March last year. Sales of whole milk products in these areas during February increased 2 percent from both January this year and February 1965. Daily February sales of skim milk products in 77 areas averaged 4 percent more than in January, and 10 percent above February a year ago. For 75 marketing areas, February daily average sales of milk and cream mixtures (half-and-half) were up 3 percent from January but were 2 percent less than a year earlier. Other fluid cream sales during February in 76 marketing areas totaled 8 percent more than for January but were 1 percent less than in February last year. Daily average sales of all fluid products in 76 marketing areas were 2 percent more than in January this year and 3 percent above a year earlier. March receipts of milk from producers, on an average daily basis, in 8 State and 72 Federal order markets were 3 percent above February but 3 percent less than March 1965. Receipts per producer during March averaged 4 percent above March last year.

PRICES IN FLUID MILK MARKETS, MAY 1966

Prices for fluid-use milk in New England averaged \$5.73 per hundredweight in early May -- 44 cents lower than April but 44 cents higher than May 1965. In Maine markets, prices were generally lower than April by 44 cents per hundredweight for Class I milk and 1 cent per quart at stores and homes. New Hampshire Class I prices were down 44 cents per hundredweight; home delivery and out of store prices decreased a cent per quart. Vermont markets reported prices at consumer levels 1 to 2 cents less than the previous month. Dealers' buying prices in these markets are not currently determined. Class I prices in the Massachusetts and Rhode Island markets reporting were 44 cents per hundredweight below April. Store and home prices in these markets varied from no change from April levels to 2 cents less. Connecticut Class I prices declined 44 cents per hundredweight. Store and home delivery in many instances were unchanged. Other prices were down a cent to a cent-and-a-half per quart.

Class I prices in Middle Atlantic areas in early May also averaged \$5.73 per hundredweight. This is 24 cents less than April but 43 cents more than May last year. Class I prices in the New York-New Jersey Federal area decreased 31 cents per hundredweight. Most store and home delivery prices in Upstate New York markets were unchanged. However, Metropolitan and Northern New Jersey areas reported downward changes of about a cent per quart in most instances. Class I prices in Southern New Jersey areas were unchanged. Store and home prices declined about a half cent per quart.

East North Central fluid-use prices in early May averaged \$4.98 per hundredweight -- the same as April but 47 cents greater than May last year. Class I and store prices in Cincinnati were unchanged; home delivery prices increased from 1 to 2 cents for quarts and 1 cent for half-gallons. Dayton, Ohio Class I prices were unchanged. Store and home prices were the same as April in some instances but as much as $1\frac{1}{2}$ cents per quart higher in other market outlets. Class I prices in Toledo, Ohio were close to April levels. Prices at homes and stores advanced a cent per quart for the most part. From Evansville, Ind., Class I and home delivery prices were reported at April levels. Some prices of both half-gallons and gallons out of stores were a cent per quart higher. Class I and home prices in Ft. Wayne, Ind. were unchanged. Half-gallons advanced 3 cents and gallons 6 cents. In Gary, Ind. Class I and home delivery prices were at April levels. Store half-gallons were down 2 cents and gallons a cent. Alton, Ill. reported Class I and home delivery prices unchanged with store prices down in some instances. A one-cent increase in home delivered quarts in some outlets was the only reported change for Peoria, Ill. Adjustments between store and home delivered prices were the only reported changes in Rock Island, Ill. At stores, a $2\frac{1}{2}$ -cent increase in some outlets and a 4-cent decrease in gallons in some outlets were the only reported changes in Detroit. Sizable increases occurred in both home and store prices in Grand Rapids, Mich. following the easing of price war conditions. Class I prices were unchanged in this market.

In the West North Central Region, prices of milk for fluid use in early May averaged \$4.87 per hundredweight. This is unchanged from April but 67 cents above May last year. In the Minneapolis and St. Paul markets, Class I prices per hundredweight declined 7 cents. At Minneapolis, store prices for half-gallons and gallons were 1 cent above April and home delivered prices for quarts and half-gallons were 2 cents higher. In St. Paul, store prices were up 3 cents on half-gallons and 5 cents on gallons; home-delivered quarts rose 2 cents. No change from April was reported in the Burlington, Iowa Class I price per hundredweight. In

this market, prices of store half-gallons and gallons declined 2 cents per unit at some outlets. Fort Dodge, Iowa Class I prices were slightly under April but store and home-delivered quarts and half-gallons were 2 to 3 cents per unit higher.

Milk used for fluid purposes in the South Atlantic States averaged \$6.06 per hundredweight in early May -- unchanged from April this year but 29 cents over May 1965. At Huntington, W. Va. there was no reported change in dealers' buying prices per hundredweight. Some store half-gallon prices rose 10 cents with gallon prices holding steady. Home-delivered prices for quarts were up 1 cent and unchanged to 3 cents higher for half-gallons. In the Tampa, Fla. market, the Class I price was close to April levels; the only other change in prices was for store gallons -- up 11 cents.

East South Central Class I prices in early May averaged \$5.70 per hundredweight -- down 2 cents from April but 32 cents more than May a year ago. At Lexington, Ky., the May Class I price was unchanged from April. Store prices were close to April levels. Some firms in the market lowered home-delivered milk prices 2 cents per individual half-gallon. Louisville, Ky. consumers paid the equivalent of 1 to 2 cents more per quart, in various container sizes, than in April. There was no change in the dealers' buying price. At Knoxville, Tenn. the only reported price change was a 2-cent increase for home-delivered half-gallons by some firms. The Nashville, Tenn. Class I price held at the April level but home and store prices rose the equivalent of 2 to 3 cents per quart in various sized containers.

In the West South Central States, prices for fluid-use milk in early May averaged \$5.92 per hundredweight, 1 cent under April this year but 63 cents above May last year. At Little Rock, Ark. the only important reported change in prices was an increase of 7 cents for out-of-store gallons. In Lawton, Okla. market milk prices generally held steady, both to producers and consumers. Exceptions were: store gallons, down 1 to 2 cents; home-delivered half-gallons, unchanged to 2 cents higher. At Tulsa, Okla., the Class I price rose 24 cents per hundredweight above April -- consumer prices held steady. In Austin, Texas the only reported price change was in store half-gallons which were 2 cents higher. Gallons sold out-of-stores, the only reported market price change, dropped 20 cents per unit at some Corpus Christi, Texas outlets.

Fluid-use prices in the Mountain States averaged \$5.76 per hundredweight in early May, unchanged from April this year but 41 cents more than a year earlier. The Phoenix, Arizona Class I price per hundredweight declined 4 cents. The only reported change in milk prices to consumers was in store half-gallons, down 8 cents in some outlets.

In Pacific Coast States, Class I prices in early May averaged \$5.37 per hundredweight -- 2 cents above a month earlier and 3 cents higher than in May 1965. Class I prices in Bremerton, Wash. advanced 47 cents per hundredweight. Consumer milk prices were up the equivalent of 2 cents per quart over April in this Market. In Everett and Seattle, Wash., Class I prices were 22 cents per hundredweight higher. At stores, some half-gallons advanced 4 cents and some gallons 8 cents. Home delivery quarts and half-gallons rose 2 cents per unit. Class I prices in the Oregon markets reporting were unchanged. For store offerings and home deliveries, prices in these markets were unchanged to 2 cents per quart above April.

a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.

b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.

c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

* Revised.

S. From State sources. PA.-Producers' association prices. ^a. Federal Order markets unless otherwise noted. ^b. Prices paid to all or to the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I prices, see Table 1 (a) for respective month. ^d. Prices paid to all or the major group of producers in each pool before applicable base and excess adjustments. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank see Table 1 (b), or other special premiums not included unless indicated. ^f. Individual handler pool. Weighted average of handlers' prices. ^g. Negotiated price paid members of principal producers' associations. ^j. Average of blend prices paid by all plants in the State. ^k. Milk Commission minimum price. ⁿ. Additional low bacteria count premium of 5¢ paid to all qualifying producers. ^p. Unregulated market. Weighted average of individual handler prices. ^q. At Toledo. ^r. Upstate Michigan--17 cents per hundredweight deducted for fall production fund.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING
AREAS UNDER STATE AND FEDERAL REGULATION, FEBRUARY-MARCH 1966

Sales of whole milk: March unchanged, February 2 percent above a year earlier

Whole milk sales (preliminary) during March in 9 State and 69 Federal Order areas averaged 98.5 million pounds per day. This is fractionally above both February this year and the 98.4 million pounds per day in March, 1965. Daily whole milk sales during February in these 78 areas were 2 percent above both January this year and February last year. The average milkfat test of whole milk sold in February was 3.53 percent compared with 3.54 percent in January and 3.55 percent a year earlier.

Skim milk sales in February 10 percent more than previous year

Daily February sales of skim milk products in 77 areas averaged 4 percent more than January and were 10 percent above February a year ago. The average milkfat test of skim milk products sold during February was 1.39 percent, unchanged from January and above the 1.34 percent in February 1965.

Mixtures sales down 2 percent from February 1965

Average daily sales of milk and cream mixtures (half-and-half) in 75 marketing areas during February were 3 percent more than January but were 2 percent less than February last year. The average milkfat test of mixtures sales in these areas, at 11.8 percent, was unchanged from January this year and February last year.

Other cream sales down 1 percent

Other fluid cream sales in 76 marketing areas for February were 8 percent above January but 1 percent below February 1965. The average milkfat test of cream items sold in these areas was 22.8 percent, compared with 22.5 percent in January and 23.1 percent in February a year ago.

Sales of all fluid products 3 percent greater than a year earlier

Average daily sales of all fluid products in 76 marketing areas during February were 2 percent more than January and 3 percent above February last year. The February average milkfat test of all fluid products was 3.54 percent, unchanged from January, and compared with 3.55 percent in February 1965.

March receipts from producers 3 percent below last year

Receipts from producers on an average daily basis in 8 State and 72 Federal Order markets during March were 3 percent above the previous month but 3 percent less than March last year. At 1,029 pounds per day, deliveries per producer in March averaged 4 percent above a year earlier.

Milk production down 4 percent from April a year ago

April milk production in the United States is estimated at 10,874 million pounds, 4 percent less than a year earlier and the smallest April output since 1953. Milk production provided 1.84 pounds per person daily, compared with 1.94 pounds in April 1965.

FLUID MILK AND CREAM CONSUMPTION IN SELECTED MARKETING AREAS, 1964-65 1/

Sales and per capita consumption data for 1964 and 1965 are shown in the remaining part of this edition. They continue the series published as Statistical Bulletin No. 312 in May 1962 and the May 1962-65 issues of the Fluid Milk and Cream Report. Data for 1964 are revised from those carried last year; for 1965, the data are preliminary.

Sales, estimated populations, and resulting per capita consumption rates are included for 77 areas. New data published for the first time are for the Tri-State, W. Va.-Ky.-Ohio Federal Order. The report shows for the first time on a consolidated basis two merged federal orders, presented separately last year -- each including additional area. These are Northwestern Ohio formed from the former North Central and Toledo areas and Eastern South Dakota which has been combined with Sioux Falls-Mitchell. Other federal markets reporting data for enlarged areas are: Southern Michigan (merged with Muskegon), Columbus, Ohio, Kansas City, and Eastern Colorado (merged with Colorado Springs-Pueblo). Muskegon and Colorado Springs-Pueblo data were not included last year. Statistics for the Central West Texas and Western Colorado federal areas shown in last year's report have been omitted this year. Data for Georgia were provided through the cooperative effort of the Georgia Milk Commission and the Georgia Agricultural Experiment Station at Griffin. All other data have been prepared as described previously. The only duplication in area coverage is for Southern New Jersey -- reported in the data for both the Delaware Valley Federal Order and the New Jersey Office of Milk Industry. Data are shown for 7 entire States: Connecticut, New Jersey, North Carolina, South Carolina, Georgia, Mississippi, and California.

Sales data for 68 areas were provided by Federal Order Administrators. Data for the other 9 areas were provided by the following agencies: Niagara Frontier and Rochester -- Division of Milk Control, New York State Department of Agriculture and Markets; New Jersey -- Office of Milk Industry; Area 2 (Pittsburgh) Pa. -- Pennsylvania Milk Control Commission; North Carolina -- State Milk Commission; South Carolina -- State Dairy Commission; Georgia -- Georgia Milk Commission; Mississippi -- State Milk Commission and Cooperating Federal Order Administrators; and California -- Crop and Livestock Reporting Service.

1/ Prepared by L. W. Haynes and J. A. Evans, Agricultural Statisticians, Agricultural Estimates Division, SRS, under the general direction of G. G. Butler, Head, Milk Section, and I. E. Wissinger, Chief, Dairy Statistics Branch.

SUMMARY

Per capita consumption rates of fluid milk and cream products continued to decline during 1965 in most markets, except for some of the specialty products. Marketing area sales advanced but usually less than population growth.

Consumption of plain whole milk during 1965 declined in more than half of the marketing areas for which data are available. Yogurt usage held its own in most markets. Sales per person of flavored whole milk continued to advance slowly.

Consumption of skim milk products continued upward but at slower rates of increase. Fewer marketing areas increased over 1964 for both plain skim and skim with solids added. Flavored skim milk usage gained a little during the year. However, buttermilk sales per capita continued to slip in additional markets.

Declines in the sales per person of most cream items prevailed through 1965. The usage of mixtures and eggnog declined in fewer marketing areas than in 1964. The declines in consumption for both light and heavy cream were about the same as last year. Sour cream usage continued to advance but at a lesser rate than a year earlier.

INTRODUCTION

The data shown in this report were prepared in a way comparable with earlier issues and as described in Statistical Bulletin No. 312. The per capita estimates are derived data, and, therefore, are not precise measurements of levels of consumption. Sales data for each specific area were reported primarily for regulatory purposes. Unregulated sales in an area may or may not have been included in the totals. However, there is comparability of data collected from year to year and resulting per capita rates are useful for a number of purposes. Consumption rates for most products are shown to the nearest hundredth pound, and fat test to the nearest hundredth percent. This procedure is followed to indicate trend but does not guarantee that level of precision.

POPULATION ESTIMATES

Population estimation procedures were given in Bulletin No. 312. This report places less emphasis on an extrapolation of the 1950-60 rate of change. Instead, the report uses Census Bureau estimates of populations of counties in certain standard metropolitan areas where available. It uses extensively county and city population estimates made by agencies within States. Census Bureau data accounts largely for the population estimates for entire States. All estimates of population have been adjusted to a July 1 date to approximate an average for the year.

Of the 77 areas, population increased 1 percent during 1965 in 27 and 2 percent in 24 areas. There were increases of 3 percent for 4 areas and 4 percent for 2. Population in 1965 was the same as in 1964 in 13 areas, down 1 percent in 6, and 2 percent in 1. The total estimated population of the entire 77 areas covered is about 140 million persons, almost $6\frac{1}{2}$ million more than for the 1963-64 comparisons. This is between 70 and 75 percent of the population using purchased milk in the United States.

PER CAPITA CONSUMPTION OF FLUID MILK AND CREAM PRODUCTS

Whole milk products

Of the 77 marketing areas having comparable data for both years, 1965 per capita consumption of whole milk products was lower in 42 (Table 14). However, the per capita rate was about the same in 2 areas and higher in 33. The rate was 5 or more pounds per person lower in 18 of the 41 areas, 10 or more pounds in only 6. These 6 were: Northwestern Ohio, Madison, Wis., Black Hills, S. Dak., Wichita, Kans., Nashville, Tenn., and North Texas. On the other hand, increases in consumption of whole milk products of at least 5 pounds per capita were reported for 11 marketing areas, as much as 10 pounds in these 5 areas: South Bend-La Porte-Elkhart, Ind. Cedar Rapids-Iowa City, Iowa, Clarksburg, W. Va., Tri-State, W. Va.-Tenn.-Ohio, and Chattanooga. Of the 10 areas with the largest populations, the per capita rate for whole milk was down in 6 but up in 4.

Skim milk products

Sales of skim milk products in 1965 in relation to population was higher than 1964 in 62 of the 77 marketing areas (Table 15). Sales were lower in 15 areas. The products included in this summary are: skim milk with and without added solids and including the 2 percent product, flavored skim and buttermilk. Total consumption of skim milk products by area was 5 pounds or more higher in 13. The upward differences were as much as 10 pounds per capita in 5/^{areas} Duluth-Superior, Minn.-Wis., Minneapolis-St. Paul, Sioux City, Iowa, Southwest Kansas and North Texas. In 19 areas, sales of skim products were 50 pounds per person or more during 1965. Four areas, Madison, Wis., Minneapolis-St. Paul, Cedar Rapids-Iowa City, Iowa, and Inland Empire, reported sales of 75 pounds or more per capita in 1965. Of the 10 largest areas (by estimated populations) 1965 per capita rates were higher than 1964 in all except Chicago and Georgia.

Milk equivalent of cream

The milk equivalent of cream sold during 1965 in 43 of the 76 areas was lower than 1964 (Table 16). (Milk equivalent is a term used to show the quantity of producer milk at average test for the market required to furnish the milkfat for the specific products.) Fluid cream products include: mixtures of milk and cream, eggnog, and various fat concentrations of sweet and sour cream. Consumption of cream in milk equivalent terms in 1965 was about the same as 1964 in 30 of the marketing areas but higher in 3. Of the 10 largest areas (population), the per capita rate was lower in 4, about the same in 5, and higher in 1.

Milk equivalent of all fluid products

Total fluid product sales in milk equivalent terms during 1965 were lower in 36 of the 75 marketing areas reporting (Table 17). Per capita rates were about the same in 4 areas but advanced for the year in 35 areas. Declines were 5 percent less in 17 areas and 10 percent or more in 7. Increases were 5 percent or more in 17 areas and at least 10 percent in 3. Of the 10 largest areas according to population, the milk equivalent of all fluid products consumed per person was lower in 6. The figure was about the same in 1 area but higher in 3.

PER CAPITA CONSUMPTION FOR INDIVIDUAL AREAS, 1964-65

New England

In the Massachusetts-Rhode Island federal order area, 1965 per capita sales of skim milk exceeded those of 1964, but sales of whole milk and cream were unchanged or slightly lower except for flavored whole milk and eggnog. Consumption in the Connecticut area was up for skim milk with solids added, flavored whole milk and eggnog. Per person usage of plain whole milk and heavy cream was below 1964 levels.

Middle Atlantic

Sales of skim milk per person in New York Metropolitan were up, other item usage down. Niagara Frontier per capita consumption was virtually unchanged for most items. Plain skim milk usage increased somewhat and there were mixed small changes in several cream items. At Rochester, whole milk consumption decreased slightly but most skim milk and cream items held steady. For New Jersey, per capita sales of flavored whole and plain skim milk increased; plain whole milk declined 3 pounds per person. For Area 2 (Pittsburgh) Pa. increased consumption was reported for skim milk (plain and solids added) and mixtures. Decreases were heaviest in plain whole milk and light cream. Total consumption, per capita, was virtually unchanged in the Delaware Valley market. The most important changes by items were as follows: plain whole milk, down 2 pounds; skim milk with solids added, up significantly.

East North Central

Cincinnati, Ohio-Ky. usage of skim milk with solids added increased as did sour cream and flavored whole milk. Sales per capita of all other items decreased. Plain whole milk consumption increased 5 pounds in the Columbus, Ohio market and there were sizable increases for skim milk, both solids added and flavored. A gain of almost 5 pounds per person in the use of skim milk with solids added was reported for Dayton-Springfield, Ohio. Usage of plain whole milk was down as it was for all cream items except sour cream. In Northeastern Ohio consumption increased for plain and flavored skim milk and most cream items. Northwestern Ohio changes in sales per person were up for skim milk items except buttermilk, but down or unchanged for all whole milk and cream items, except yogurt and eggnog. Consumers in the Youngstown-Warren, Ohio marketing area increased purchases of skim milk with solids added and sour cream. Per capita decreases were reported for plain skim milk and light cream. Purchases per consumer at Fort Wayne, Indiana were up for most whole and skim milk items, but cream sales were generally down except for sour cream. In Indianapolis, Ind., usage of skim milk with solids added and flavored whole milk increased significantly. Decreases in per-person usage were reported for mixtures, light cream, flavored skim and buttermilk. Sales per person in the South Bend-La Porte-Elkhart, Ind. market were well above 1964 levels for plain and flavored whole milk, plain skim milk, buttermilk and sour cream. Lower consumption of skim milk with solids added, flavored skim milk and light cream was reported. For Chicago, sales of plain whole milk were 2 pounds per person higher. Flavored whole milk, eggnog, and sour cream increased. Usage of most skim milk items decreased but consumption of cream held about steady for most items. Suburban St. Louis, Ill. consumption was up for plain whole milk, plain skim milk with solids added, skim milk, and sour cream. Most other items were virtually unchanged from 1964 levels. The Michigan Upper Peninsula, Mich.-Wis. area usage of solids added skim milk was up 5 pounds but plain whole milk sales per person were off 3 pounds. In Southern Michigan, there was increased consumption of all fluid products except buttermilk and light cream. Higher usage for most fluid products occurred in Upstate Michigan. Whole milk sales dropped in Madison, Wis. There were small differences for other sales. Smaller whole milk sales per consumer in Milwaukee was the most important change for the market. A plain whole milk sales drop of 6 pounds per person in Northeastern Wisconsin was the most important difference between 1964 and 1965.

West North Central

In Duluth-Superior, Minn.-Wis., consumption of skim milk with solids added increased markedly. Many other product takings were lower with buttermilk and sour cream as exceptions. Sizable increases in usage of most skim milk items in Minneapolis-St. Paul were reported. Whole milk and most cream product consumption was also lower in this area. Whole milk and sour cream per person marketings were higher in Cedar Rapids-Iowa City, Ia.; important declines in only mixtures and heavy cream also occurred. Most usage changes from 1964 in Des Moines, Ia. were small. Sales per capita for most whole and skim products in North Central Iowa were higher with consumption of cream items at generally lower levels than the previous year. In the Quad Cities-Dubuque, Ia.-Ill. marketing area, small decreases in consumption of most fluid products were reported. Consumption of skim milk items except buttermilk and flavored whole milk was higher in Sioux City, Ia.-Nebr.-S.-Dak. Other item sales per person in this area were close to 1964 levels. Increased consumption of most whole and skim products was reported for Kansas City. Eggnog and sour cream usage was up but other cream items were lower in this marketing area. For the Ozarks, Mo.-Ark. area, sales per capita were higher for whole milk items, most skim products, eggnog, and light cream. Other product takings were close to previous year levels. Usage of most fluid products in St. Joseph, Mo.-Kans. were lower. In St. Louis, the most important increase in consumption was for plain skim milk. Per person sales of light cream and sour cream decreased. Other products remained close to year earlier levels. Consumption of plain whole milk in Black Hills, S.D. dropped in 1965. Most skim item marketings were up; cream item sales per consumer except sour cream declined. There was generally lower consumption of all items except skim milk both plain and with solids added in Eastern South Dakota. Most skim product sales per person in the Nebraska-Western Iowa area were higher. Consumption for other items except flavored whole milk, eggnog and sour cream showed lower rates for 1965. Generally lower consumption levels were reported for the Neosho Valley, Kans.-Mo. area. Higher sales rates per person were reported in Southwest Kansas for skim items, mixtures and sour cream; whole milk and other item usage was down. For Wichita, Kans., skim with solids added, eggnog, and sour cream consumption was higher. Other usage was lower.

South Atlantic

Consumption in the Upper Chesapeake Bay area remained steady with small increases in some skim and cream items. Whole milk consumption in Washington, D. C. was slightly lower but there were small increases in some other items. Appalachian, Tenn.-Va.,-W. Va. consumption was generally upward but sales per person of mixtures, light and heavy cream were down. All item sales per person in Clarksburg, W. Va. were higher except plain skim, mixtures, and light cream. Consumption of nearly all fluid items in the Tri-State area, Ky.-Ohio-W. Va. was higher, for some items substantially. Higher usage in Wheeling, W. Va.-Ohio was reported for most items; plain skim, light and heavy cream were exceptions. North Carolina consumption was either unchanged or higher for most fluid items, but buttermilk was down. Usage of most whole and skim items in South Carolina during 1965 was greater than 1964. Sales per person of cream items were steady to lower. In Georgia, consumption of whole milk and several other items was higher; others declined. Usage of whole milk, most skim items and some cream items in Southeastern Florida was greater.

East South Central

Whole milk and most skim item consumption in Louisville-Lexington-Evansville, Ky.-Ind. advanced. Light cream takings in this market dropped. Usage of most fluid items except heavy cream for 1965 in Paducah, Ky. was either at the 1964 level or higher. A 9-pound-per-person increase in sales was reported in Chattanooga, Tenn.; other item takings were lower in most instances. Consumption of whole milk items in

Knoxville, Tenn. was higher than 1964 but usage of most other items was lower. Total sales of whole milk per person in the Tennessee and Arkansas portion of the Memphis area were higher; other items were lower. A decline in consumption of most fluid items in Nashville, Tenn. was reported. For the entire State of Mississippi, 1965 usage was higher for nearly all fluid items.

West South Central

Increases in 1965 per capita sales over 1964 of plain whole milk, eggnog and sour cream were reported for Central Arkansas; other purchases per consumer were lower but not offsetting. Consumption for most whole and skim milk items in New Orleans was higher; light cream was down, sour cream up. In Northern Louisiana, takings per consumer showed advances for most products. Plain and flavored whole milk, skim with solids added, and sour cream consumption in Oklahoma Metropolitan was higher; other item marketings per individual were lower. Usage of plain whole milk and most cream items was less in Red River Valley, Tex.-Okla.; skim items showed increases. In Austin-Waco, Tex., consumption in 1965 was close to 1964 levels for most products. Purchases per consumer for most fluid products in Corpus Christi, Tex. were higher; the exception was mixtures. Lower per person sales for most items were reported for the Lubbock-Plainview, Tex. area. Skim with solids added and heavy cream were higher, however. Substantial declines in usage of plain whole milk, plain skim milk and light cream occurred in North Texas. Skim with solids added on the other hand made a sizable increase. In San Antonio, consumption of most fluid products was close to the levels of a year earlier. Marketing of plain whole milk and some skim items per person declined in Texas Panhandle, Tex.-Okla. Most cream item usage advanced.

Mountain

The Eastern Colorado marketing area was characterized by steady to lower consumption per person for most whole and skim milk and cream items. Rio Grande, N. Mex.-Tex.-Colo. usage held about steady for most skim milk items, but plain whole milk sales per capita and those for certain cream items such as mixtures and eggnog were down considerably. A 5-pound drop in plain whole milk consumption was reported in Central Arizona. Sales of most skim milk and cream items held steady. For Great Basin, Utah-Nev.-Wy. the only important changes were: skim milk with solids added, up 6 pounds per capita; plain whole milk, down 5 pounds; plain skim milk, down 1 pound.

Pacific

Sales per person in the Inland Empire, Wash.-Ida. area were higher for flavored skim milk and skim milk with solids added. Relatively minor mixed changes were reported for all cream items and a 4-pound decrease in plain whole milk sales was reported. Per capita usage of plain skim and skim milk with solids added was well above 1964 in the Puget Sound, Wash. area. A drop in consumption of plain whole milk and light cream also occurred. In California, whole milk sales dropped 8 pounds per person. Sales of the 2-percent product increased $2\frac{1}{2}$ pounds per person. Sales of all other items were virtually unchanged or lower.

Footnotes for Table 18:

F-Federal Order marketing areas unless otherwise noted. S.-Sales data from State sources. FS-Sales data from State and Federal sources.

a. Quantities sold within the defined Federal Order marketing area or other specified geographic area.

b. Milk equivalent data represent the quantity of producer milk at average test required to provide the milkfat in the respective product groupings.

c. Data for marketing area after the merger and expansion in 1965.

d. Population and the resulting per capita rates revised for earlier years. (See pages 52, 53 and 54.)

e. All cream items converted to an equivalent of 38 percent cream.

f. Sales in Area 2 (Pittsburgh), Pa. are estimated from Pennsylvania Milk Control Commission data covering total sales for the Area and sales by product by 22 large handlers, and from studies made by the Department of Agricultural Economics and Rural Sociology of Pennsylvania State University. Plain skim milk includes solids added, low fat (2.0 percent) is shown in the solids added column and medium cream (24.1-34 percent fat) is in the eggnog column. Light cream ranges from 18-24% fat and heavy cream over 34 percent fat. Yogurt and eggnog sales have not been tabulated.

g. Delaware Valley sales include the portion of the area in Southern New Jersey which are also included in New Jersey totals.

h. Not reported where individual plant data might be disclosed.

i. Data for marketing area prior to the area change in 1965.

j. Skim milk with solids added and flavored skim milk combined.

k. Data for marketing area after the expansion in 1964.

m. Heavy cream and light cream combined.

p. Plain skim milk combined with skim milk with solids added.

q. Includes following quantities of whole lactic milk and creamed buttermilk: 1964, 3,979 thousand pounds, .87 pounds per person; 1965, 4,078 thousand pounds, .88 pounds per person.

r. Includes fluid milk equivalent of concentrated milk.

s. Sour cream includes medium cream.

t. Mixtures and eggnog combined.

u. Plain whole milk and flavored whole milk combined.

v. Skim milk (2 percent fat) in the skim milk solids added column, pastry cream in the eggnog column and table cream in the light cream column.

w. Yogurt, eggnog and sour cream not tabulated.

x. Flavored whole milk and flavored skim milk combined.

y. Heavy cream and sour cream combined.

z. Sour cream and light cream combined.

Cap. 2
JUNE 1966

JUL June 17, 1966

SUMMARY

~~CONFIDENTIAL~~ ~~STATISTICAL RECORDS~~

Dealers' prices paid for milk used for fluid purposes and consumers' home and store prices in early June were generally unchanged from May levels, the Crop Reporting Board reports. Prices paid by dealers were up significantly in only 5 markets; other markets reported changes of less than 11 cents per hundredweight. Prices for home delivered milk were higher in 11 markets for quarts and 14 markets for half-gallons; lower prices were reported in 4 markets for quarts and half-gallons. At stores prices increased in 11 markets for half-gallons and gallons but prices were lower in 8 markets for half-gallons and 6 for gallons.

Prices paid by dealers for milk used for fluid purposes in about 165 markets throughout the United States averaged \$5.51 per hundredweight in early June -- 1 cent more than May and 40 cents above June 1965. (These prices do not represent prices paid directly to producers. See the footnote on Table 2, page 14.) The June price is also 40 cents above the 1960-64 average for the month. Fluid-use prices were the same as May in 5 of the 9 regions and higher in 4, with the greatest increase being 3 cents per hundredweight in the East South Central. Compared with June last year, prices averaged higher in all regions. These increases ranged from 3 cents per hundredweight in the Pacific Region to 67 cents in the West North Central. Other regional increases from June 1965 were: West South Central, 62 cents per hundredweight; East North Central, 48 cents; New England and Middle Atlantic, 44 cents; Mountain, 42 cents; East South Central, 34 cents; and South Atlantic, 21 cents.

Whole milk delivered to homes in 25 major cities averaged 29.2 cents per single quart in early June, unchanged from May, but 1.4 cents above June last year and 2.6 cents higher than the June 1960-64 average. Half-gallons sold out of stores in these cities averaged 48.5 cents. This is one-tenth cent below May but 3.1 cents more than June 1965, and 3.3 cents above the 1960-64 average for the month.

Whole milk sales (preliminary) in 78 marketing areas (9 State and 69 Federal) during April, on a daily basis, averaged 2 percent less than March but 1 percent above April 1965. During March, average daily sales of whole milk products were unchanged from February this year and March 1965. March average daily sales of skim milk products in 77 areas were up 2 percent from February and 8 percent from March 1965. Average daily sales of milk and cream mixtures (half-and-half) in 75 marketing areas during March were virtually unchanged from February but 3 percent below March 1965. For 76 marketing areas, March sales of other cream items were 2 percent below February and 3 percent below March a year ago. March average daily sales of all fluid products in 76 marketing areas were about the same as in February this year but were 1 percent more than in March 1965. April receipts from producers (average daily basis) in 8 State and 72 Federal order markets were 3 percent above the previous month but 2 percent under April last year. At 1,074 pounds per day, deliveries per producer in April averaged 5 percent over a year earlier.

PRICES IN FLUID MILK MARKETS, JUNE 1966

In New England, prices for fluid-use milk in early June averaged \$5.73 per hundredweight. This is at the May level but 44 cents higher than last year. No changes in current Class I prices were reported for any New England markets. In the Manchester-Nashua-Portsmouth, N. H. area, home and store prices were $\frac{1}{2}$ cent to a cent higher this month. Bellows Falls, Vt. home delivered quarts and store half-gallons advanced $\frac{1}{2}$ cent per quart. Home delivered half-gallons were unchanged. Home delivered quarts in some outlets in Burlington, Vt. were the same as May for the only important change in this market. Dealer purchasing prices in these markets are not currently reported. Store half-gallons in Rhode Island markets were down 1 cent. Home delivered quarts were priced $\frac{1}{2}$ cent higher by some firms; other prices in this area were unchanged. In Hartford, Conn., half-gallons out of stores declined 2 to 6 cents for the only reported price change in the market.

Milk used for fluid purposes in the Middle Atlantic States averaged \$5.75 per hundredweight in early June -- 2 cents above May and 44 cents over June 1965. The Class I price in Buffalo, N. Y. advanced 28 cents per hundredweight. Home and store prices were unchanged in this market. Class I prices in the New York-New Jersey area were unchanged from May. Half-gallons in some store outlets in Albany, N. Y. advanced a cent. In Nassau and Suffolk Counties, some store half-gallons declined a cent but home delivered half-gallons were 2 to 3 cents higher. In New York City, store half-gallons and home delivered quarts were a cent per quart higher in some instances. Store gallons and half-gallons in Westchester County, N. Y. were each 2 cents higher than May. In Northern New Jersey, mixed changes in store prices were reported but home delivered prices were $\frac{1}{2}$ cent to a cent per quart lower. Rochester, N. Y. Class I prices were 28 cents per hundredweight higher. Home and store prices increased about 1 cent per quart.

Fluid-use prices in East North Central markets in early June averaged \$4.98 per hundredweight -- unchanged from May but 48 cents above June. In Toledo, O., home delivered quarts were 2 cents lower for some dealers for the only reported change in that market. Some home delivered quarts advanced 2 cents in the Youngstown-Warren, O. area for the only important reported change. Evansville, Ind. store half-gallons were 2 cents lower for some outlets and store gallons were 5 cents higher in some instances for the only reported price changes. The only important change in Ft. Wayne, Ind. prices were 2 cents per quart higher in home delivery prices. Store prices in Gary, Ind. advanced a cent per quart; other prices were unchanged. The Class I price in Alton, Ill. was unchanged; mixed price changes at home and store levels were reported. In Chicago, Ill., Class I prices were the same as May. Store gallons and home delivered half-gallons were $\frac{1}{2}$ cent per quart higher for the only reported change in the market. Class I and store half-gallon prices in Rockford, Ill. were unchanged. Store gallons were 5 to 10 cents higher; home delivery prices gained a cent per quart. Store half-gallon prices in Springfield, Ill. dropped 10 cents in some outlets for the only important price change. Class I prices in Grand Rapids and Kalamazoo, Mich. were the same as May. Various upward changes in home and store prices were reported. Half-gallons out-of-stores were $\frac{1}{2}$ cent higher for the only reported change.

West North Central prices for fluid-use milk in early June averaged \$4.87 per hundredweight. This is unchanged from May but 67 cents more than June last year. Home delivery prices in Duluth, Minn. were 2 cents per quart higher; store half-gallons rose 5 cents for the only other change. Burlington, Iowa store prices were unchanged to 2 cents more per quart over May; other prices were unchanged.

St. Louis, Mo. store gallons were 2 cents lower for the only reported price change. The Class I price in Bismarck-Mandan, N. D. advanced 30 cents per hundredweight; other prices were at May levels. The only reported change in Topeka, Kans. was a 1 cent decline in home delivered half-gallons.

Class I prices in South Atlantic markets in early June averaged \$6.07 per hundredweight -- 1 cent more than May and 21 cents over June a year ago. No important price changes were reported for this region.

In the East South Central States, milk used for fluid purposes averaged \$5.73 per hundredweight. This is 3 cents above May and 34 cents greater than June last year. The Class I price in Paducah, Ky. advanced 23 cents per hundredweight; home and store prices were unchanged from May. Half-gallons in some Knoxville, Tenn. outlets were up 2 cents for the only reported market change. In Nashville, Tenn., a Class I price increase of 25 cents per hundredweight was the only reported change.

Fluid-use milk prices in West South Central markets averaged \$5.91 per hundredweight. This is 1 cent more than May and 62 cents over June 1965. A price war in Lawton, Okla. resulted in declines of 2 to 7 cents per quart in prices for this market. Class I prices were unchanged. Corpus Christi, Tex. reported decreases of 10 to 14 cents in store gallons for the only reported change. Houston, Tex. home delivered prices were unchanged to 1 cent per quart higher; other prices were at May levels.

In the Mountain States, milk for fluid-use prices averaged \$5.76 per hundredweight in early June -- the same as May but 42 cents above June last year. Store prices in Phoenix, Ariz. showed mixed changes. Home delivered half-gallons dropped 7 cents for the only other reported change.

Milk used for fluid purposes in Pacific Coast States averaged \$5.37 per hundredweight in early June. This is the same as May but 3 cents above June 1965. The Class I price in Bremerton, Wash. advanced 10 cents per hundredweight. Gallons at some store outlets increased 8 cents for the only other reported change. The Class I price in Portland, Ore. was unchanged from May. At stores, half-gallons in some outlets were 2 cents lower and gallons in some instances dropped 2 cents. Other prices were at May levels.

a. Effective prices paid by dealers for milk used for fluid purposes -- packaged or bottled products. In classified markets, this use is usually called Class I. Prices paid for milk eligible for fluid use but in excess of Class I needs are not reflected in these averages. Table 5 shows blend prices, for selected marketing areas, paid to producers which represent usage in all classes. Effective prices in Federal and State order markets include negotiated premiums above minimum prices. A flat price, one price for all uses, is paid in a few unclassified markets. * Revised.

- a. Prices are the latest reported during the first 10 days of each month. Grades may differ by market.
b. New York Metropolitan - New York City plus Nassau, Suffolk and Westchester counties all in the State of New York.
c. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two-quart purchase.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS
UNDER STATE AND FEDERAL REGULATION, MARCH-APRIL, 1966

Whole milk sales: April 1 percent above, March unchanged from a year earlier

Average daily whole milk sales (preliminary) during April in 78 marketing areas (9 State and 69 Federal) amounted to 96.8 million pounds. This is 2 percent less than March but 1 percent more than the 96.2 million pounds per day in April 1965. Daily whole milk sales during March in these 78 areas were unchanged from February this year and March 1965. Cumulative daily sales January through March averaged 1 percent more than for the same period last year. The average milkfat test of whole milk sold in both February and March was 3.53 percent, compared with 3.55 percent in March 1965.

Skim milk sales in March up 8 percent from year earlier

March average daily sales of skim milk products in 77 areas were up 2 percent from February and 8 percent from March 1965. Of the 36 groups of markets shown, sales were higher than a year earlier in 31 and lower in 5. Ten of the 31 groups that were higher had increases of at least 10 percent. Daily sales, January through March, averaged 9 percent above the same period last year. The average milkfat test of skim milk products during February and March was 1.39 percent, compared with 1.33 percent in March 1965.

Mixtures sales down 3 percent from March 1965

Average daily sales of milk and cream mixtures (half-and-half) in 75 marketing areas during March were virtually unchanged from February but 3 percent below March 1965. Sales were less than in March 1965 in 20 of the 34 market groupings and greater in 11. The average milkfat test of mixture items in these areas was 11.8 percent in both February and March this year and March 1965. Average daily sales, January through March, totaled 2 percent less than a year earlier.

Other cream sales down 3 percent

For 76 marketing areas, March sales of other cream items were 2 percent below February and 3 percent below March a year ago. Of the 35 groups of markets, 23 had lower sales and 11 higher sales compared with March 1965. Daily sales of fluid cream for the January-March period averaged 2 percent less than in 1965. The average milkfat test of cream items in these areas during February and March was 22.8 percent compared with 22.9 percent in March last year.

Sales of all fluid products 1 percent above March 1965

March average daily sales of all fluid products in 76 marketing areas were virtually unchanged from February this year but 1 percent more than in March 1965. March sales, 1966 versus 1965, for the 35 area groupings compare as follows: higher in 21, lower in 5, and unchanged in 9. January through March 1966 daily sales of all fluid products averaged 2 percent above a year earlier. The average milkfat test of all fluid products for March was 3.53 percent compared with 3.54 percent a month earlier and 3.56 percent in March 1965.

(Continued on page 28)

F-Federal Order unless otherwise noted; S-From State sources; FS-From Federal and State sources.

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See page 28 for area combinations. b. Federal totals less State data on receipts from New Jersey or Mississippi producers where applicable. d. Plant receipts of Grade A milk from producers in the State. e. Estimated.

Compiled from reports of Market Administrators and State milk control agencies.

OFFICIAL BUSINESS

(Continued from page 21)

April receipts from producers 2 percent below a year earlier

April receipts from producers for 8 State and 72 Federal order markets were 3 percent above the previous month (average daily basis) but 2 percent under April last year. At 1,074 pounds per day, deliveries per producer in April averaged 5 percent over a year earlier.

May milk production below 1965

May milk production in the United States is estimated at 11.7 billion pounds, 4 percent less than a year earlier and the smallest May output since 1940. May milk output provided 1.92 pounds per person daily, compared with 2.03 pounds a year earlier.

AREA COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in tables of this report: Ohio-Cincinnati, Columbus, Dayton-Springfield, Northeastern, Northwestern and Youngstown-Warren; Indiana-Fort Wayne, Northwestern and Indianapolis; Illinois-Chicago, Rock River Valley (receipts only) and Suburban St. Louis; Michigan-Upper Peninsula, Southern and Upstate; Wisconsin-Madison, Milwaukee and Northeastern; Minnesota-Duluth-Superior and Minneapolis-St. Paul; Iowa-Cedar Rapids, Des Moines, North Central, Quad Cities-Dubuque and Sioux City; Missouri-Kansas City, Ozarks, St. Joseph and St. Louis; South Dakota-Black Hills and Eastern; Kansas-Neosho Valley, Southwest and Wichita; West Virginia-Appalachian, Clarksburg, Tri State and Wheeling; Two Kentucky-Indiana areas-Louisville-Lexington-Evansville and Paducah; Tennessee-Chattanooga, Knoxville, Memphis and Nashville; Mississippi-Mississippi, Gulf Coast (S), Northeast (S) and Southwest (S); Arkansas-Central and Ft. Smith; Louisiana-New Orleans and Northern; Texas-Austin-Waco, Central West, Corpus Christi, Lubbock-Plainview, North Texas, Panhandle and San Antonio; Colorado-Eastern and Western; and Washington-Inland Empire and Puget Sound.
